PAGE 1 OF 5

<b>Product Family</b>	Light Handle Covers and Camera Covers
<b>Intended Use</b>	<p>Light Handles: are intended to provide a sterile interface between the operating room surgical lamps (non-sterile) and the Surgeon or Nurse (sterile)</p> <p>Camera Covers: intended to provide a sterile interface between the non-sterile surgical camera and the Surgeon</p>
<b>Description</b>	<p>Light Handle Covers: are sterile, single-use devices intended to act as a sterile surface between the non-sterile surgical light and the Surgeon or healthcare professionals during procedures. The devices are available in two main configurations: Rigid Light Handle Cover and Flexible Light Handle Cover</p> <p>Camera Covers: single use universal rigid cover for O.R. cameras, in this case typically attached to an O.R. light. The cover has a transparent material assembled into the distal end to provide a sterile interface while maintaining proper camera visibility. The devices are available in two main configurations: Rigid Camera Cover and Flexible Camera Cover</p>
